

Smart Technology

- Remote Monitoring & Controlling on real time basis
- Comprehensive Monitoring
- Enhanced Reports for Data Analysis
- Tamper Proof features
- Demand Side Management Tool

 **ELECRAMA-2016**

HPL Elecrama 2016 Newsletter

Success is measured by every step you make.

This year, HPL made its presence felt at ELECRAMA 2016, the biggest showcase in the world of electricity held at Bangalore International Exhibition Centre (BIEC) from February 13-17, 2016 organized by IEEMA – the representatives of the Indian Electrical Industry.

The five-day event was studded with innovative product previews, latest technology presentations, concepts and pure business interactions. HPL showcased its world-class products alongside other international players; making a strong case for the high quality and competitiveness of Indian products. This was perfectly in tune with the whole “Make in India” revolution that is taking over the country.

This was ELECRAMA's 12th edition, with some leading names in the electrical industry taking part. Of the many eminent personalities who attended, Shri. Piyush Goyal, our Honourable Union Minister of Power, Coal, New and Renewable Energy was one of them. He addressed the conference talking about their vision to provide 24x7 electricity supply to each and every house in India.

Karnataka's Energy Minister, Mr. D. K. Shivakumar launching Range of HPL Smart Meters.

Deputy Minister of Power & Renewable Energy, Sri Lanka, Mr. Ajith Perera

Our executives gave live demonstrations of HPL's unique product line.

HPL's products attracted interest of many international and national delegates.

The Smart City Booth

HPL has aligned itself with the Smart Cities Mission, an initiative that is being supervised by India's Prime Minister, Shri. Narendra Modi himself to make Indian cities smart, intelligent and energy efficient.

Spread out across 300 square meters, HPL exhibited its latest innovations and world-class products from its vast and diverse range to that effect.

HPL displayed its latest finest innovations – Smart Meters, launched by Karnataka's Energy Minister, Mr. D. K. Shivakumar and Smart Street Light. The Smart Street Light Control System is a significant piece of technology developed by HPL's best-in-class R & D department to curb the electricity problems faced by Indian cities in street lighting.

Yet again, HPL's participation at Elecrama was a resounding success with leading news channels and newspapers covering its superior range of products. An equivalent amount of buzz was created on on social media as well.

"HPL in an endeavour to support the **Smart Cities** Mission has consciously focused on creating and marketing products that help conserve energy and prove to be cost-effective in the long run. In a country like ours, where the need for power is continuously increasing, electronic equipments have a huge role to play in energy optimisation."

Mr. Lalit Seth
CMD, HPL

Elecrama 2016 Showstoppers

ATS CM 335 Controller

Advance Version Automatic load Transfer Switch (AV ATS)

- Total safety with phase barrier source separator & terminal cover
- Arc chutes studded for enhanced safety against arcs.
- High thermal withstand capacity & insulation voltage.
- Remote operations.
- Maximum parameter for auto switching

bsäfe

MCB | DB | RCCB

Let's be clear, we are not talking about any MCB here. BSafe is what most industry insiders have hailed as a monumental feat of engineering that goes way beyond the standard of regular MCBs. In the category of Miniature Circuit Breakers, this one with its exquisite design and performance is as perfect as it can get.

Pad Lock

Cable Termination upto 35mm² Cable

Contact Position Indicator

3 Position Mounting Clip

Smart Street Light Control System (CCMS)

- Centralized Control Monitoring System (CCMS)
- Remote monitoring & controlling
- Group Controlling
- Comprehensive Monitoring
- Real time control
- Enhanced computerised reports
- Power theft alert
- Many other advanced features
